

# Turtle Wax Rubbing Compound

## TECHNICAL DATA SHEET

For Professional Results. Precision cutting power helps restore paint to like new appearance. Removes medium to heavy stains, oxidation and scratches. Clear coat safe and silicone free. Unique compounds with precise cutting action remove heavy blemishes, oxidation, severe scuffs and abrasions, restoring the surface to a clean, smooth finish. This body shop safe formula provides exceptional performance.

- \* Medium cut compound is formulated with an aggressive blend of nanotechnology polishing agents to restore you car's finish
- \* Removes scratches, heavy swirl marks, surface blemishes and 1500 grit sanding scratches
- \* Re-stores gloss and prepares the finish for waxing
- \* Silicone free formula is safe for use in professional detail and paint and body shops
- \* Precise cutting action for professional results
- \* Remove heavy blemishes, oxidation & severe scuffs
- \* Clear coat safe & silicone free

### STEP 1

Wash and dry car. Use Premium Rubbing compound to deep clean and smooth clear coat. Use Premium Polishing compound to enhance paint finish and increase shine.

### STEP 2

Test first on an inconspicuous area for compatibility with the finish. Not for use on flat or matte finishes.

### STEP 3

Pour onto foam applicator or microfiber towel and rub into problem area to remove oxidation, scratches and finish imperfections. Finish with Turtle Wax® Paste Wax for maximum gloss, protection and durability.
